

## function.c

```
1 #include <stdio.h>
2
3 // Create a function
4 void calculateSum(int a, int b) {
5     int sum = a + b;
6     printf("The sum of %d + %d is: %d\n", a, b, sum);
7 }
8
9 int main() {
10
11     int x, y;
12     printf("Enter first number: ");
13     scanf("%d", &x);
14     printf("Enter second number: ");
15     scanf("%d", &y);
16     calculateSum(x, y); // call the function
17
18 //calculateSum(5, 10); // call the function
19 return 0;
20 }
```
